

Course:	INFO1251 (Web Server & N/W Fundamentals)
Professor:	Sumit Shrestha
Project:	Microsoft Azure and IIS
Due Date:	

How will my lab be marked?

Q.	What are the Marks Awarded For?	Marks
1	Install Windows Server on Microsoft Azure Install IIS on the server (1 screenshot)	3
2	Disable Default Website. Download a free HTML template from https://www.free-css.com/free-css-templates and add it as a new website in IIS	1.5
3	Rename index.html page as mypage.html for the new website created in Q2 and add mypage.html as a Default Document in IIS Manager (1 screenshot)	1
4	Create a second website in IIS. Assign 9090 as its default port. Download a new template from the link provided in Q2 and add it to this website. Note: you should have two sites after completing this step. Both website must have separate templates.	2
5	Register a domain in either freenom or no-ip . Create an A record with public IP of Windows VM in azure for the registered domain. (1 screenshot)	1.5
6	Access both websites from primary OS or any other device by using the registered domain. (2 screenshot)	1
	Total	10

Submission Details

You must submit a single **pdf or a doc** file with all the screenshots with proper labels. Use **Lab4** as a submission folder.

Marking will be done entirely upon the screenshots provided. Some of the screenshots may account to multiple questions. In case of any doubt please ask.
